## TECHNICAL SPECIFICATIONS

### Performers:

Don't Drink and Dance

2

H2H

4

### Performance Space:

7x7 meters

We can perform on flat surface or grass. If you can provide a stage or dance floor that would be very helpful, otherwise we can bring our own floor.

### Get in time:

20 minutes if we have to set our own floor. If you provide a floor/ stage: 5 mins. We are very self-sufficient and therefore don't require a technical team.

### Sound and Light:

We have our own sound system. However if you provide a sound system we require a CD- player or I-pod connection.

If the performance time is after sunset, we require basic stage light.

### Access Requirements:

We require access on site for our van and somewhere to park. If we are to bring our own flooring, we would be grateful of a drop-off point close to the performance site.

### Warm up space:

We require warm up space: preferably, with a high ceiling. If this is not possible please let us know and we can talk about options.

**Please do not hesitate to contact us should you have require any further information.**
